

What is “Vuex”?

Vuex is a library for managing global state

Why Vuex?

Managing app-wide / global state can be difficult

“Fat Components”

App.vue (or similar components) contain lots of data and logic

Unpredictable

It's not always obvious where data (state) gets changed in which way

Error-prone

Accidental or missed state updates are possible

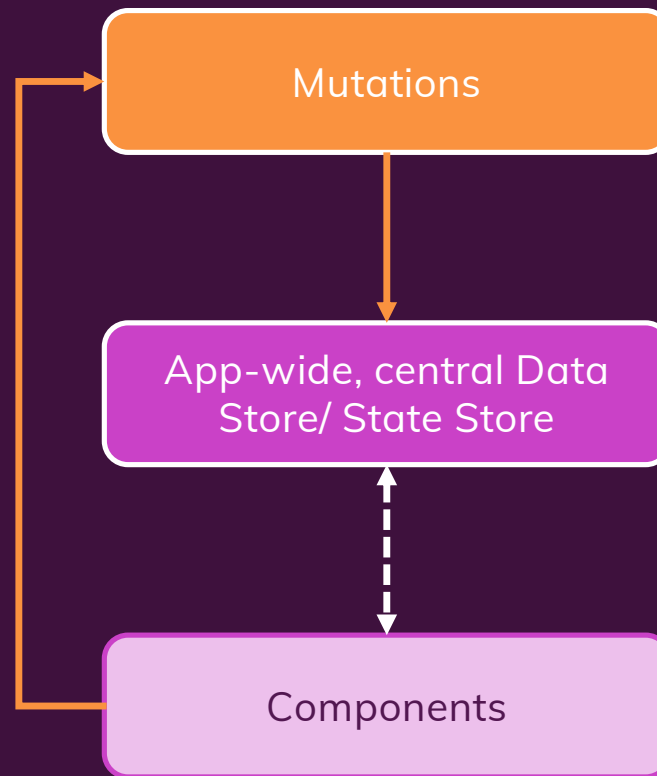

With Vuex

Outsourced state management

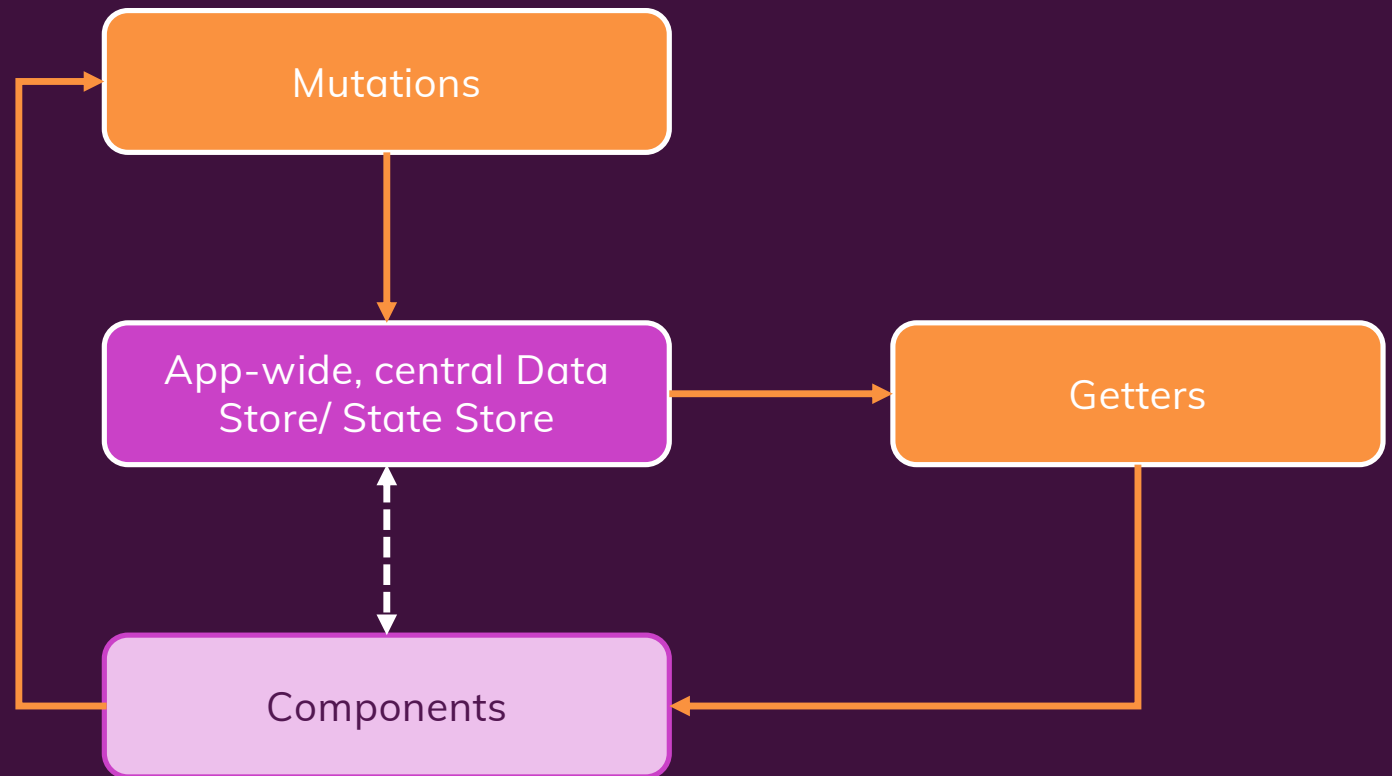

Predictable state management / flow

Clearly defined data flow:
Less errors

How Vuex Works
